

KinesiaU™

MOTOR ASSESSMENT SYSTEM

VALIDATED SMARTWATCH-BASED **PRESCRIPTION APP** TO MANAGE PARKINSON'S DISEASE AND OTHER MOVEMENT DISORDERS

The KinesiaU motor assessment system is a validated, low-cost prescription app to measure Parkinson's disease and other movement disorder symptoms using an Apple or Android smartwatch. KinesiaU objectively evaluates, tremor, slowness, and dyskinesia in response to medication and exercise in user-friendly reports that you can view on your smartphone. Additionally, your healthcare provider can remotely view your reports in real-time through the KinesiaU provider portal to assist in making therapy adjustments to dosing and timing without you having to visit your doctor as frequently.

PORTABLE & EASY TO USE

Perform two simple 7- second motor assessment tasks anytime or anywhere with the KinesiaU™ motor Assessment system.

TRACKING

KinesiaU not only allows you to track tremor, slowness and dyskinesia, it also has the ability to track therapies and activities in user-friendly reports.

DETAILED REPORTS

Your healthcare provide can view your reports in real-time through the KinesiaU provider portal to assist in making better care decisions for treating your symptoms.

The KinesiaU™ motor assessment system is intended to monitor physical motion and muscle activity to quantify kinematics of movement disorder symptoms such as tremor and assess activity in any instance where quantifiable analysis of motion and muscle activity is desired. The KinesiaU™ motor assessment system is to be used only under the direction of a qualified clinician and all changes to therapy regimens are to be based solely on the clinical judgment of the clinician. See www.KinesiaU.com for additional warnings and instructions for use.

KinesiaU™ is a trademark of Great Lakes NeuroTechnologies Inc. The KinesiaU motor assessment system and its use are covered by one or more patents listed at www.glneurotech.com/patents
